

EIRIK GRUDE FLEKKØY  
born in Bærum, Norway 1963

Dr. Scient. (PhD) degree, University of Oslo 1993  
Post-Doc, MIT, Cambridge 1994  
Post-Doc, ESPCI, Paris 1995  
Post-Doc, University of Oslo 1996  
Associate professor, University of Oslo 1997  
Research Scientist, University of Oslo 1998–2000  
Research Scientist, Centre of Advanced Study, Oslo 2000-2001  
Visiting professor, University of Honolulu 2004-2005  
Professor of physics, University of Oslo 2001

**Main activities:**

My current activities are research leadership, teaching and communication. My research and teaching concerns petroleum related problems of physics/geophysics, in particular granular flows, two phase flow in porous media and hydrodynamics. The research is based on computer simulations and theory in collaboration with experimentalists. I teach one course on computer simulations in physics and one on statistical mechanics and hydrodynamics. Apart from Norwegian, I speak english and french. For play I enjoy time with my kids, as well as sailing, kiting, surfing and mountain climbing.

**Publications and PR:**

54 Scientific articles  
The book *Sandslott og Flodbølger*, Eirik G. Flekkøy, Cappelen 2006  
Chapter in *Naturens kode* Gyldendal 2005  
Contributed in 1 national TV and 8 radio programs on science the last 2 years  
In april 2007 I organized the art exhibition *Complexity in Nature* at the national library, showing pictures from research.

**Administration and leadership:**

Group leader of the AMKS group with 23 members 2007, a *Toppforskningsmiljø* at UiO since 2007.  
Chairman and main organizer of two international conferences in Norway 2002 and 2004  
President of the Condensed matter Physics section of the Norwegian Physical Society, 2001–2003  
Co-organizer and co-funder of Complex, the largest physics collaboration in Norway  
I am heading a 5 person group of phd students and postdocs my university  
I have acted as an 'opponent' on 8 PhD committees the last 5 years.

**External funds and resources:**

I have since 1993 obtained various grants from the Norwegian Science Foundation (NFR), participated internationally on 2 EU proposals, carried out consulting for industry (Norsk Hydro), and attracted phd students and postdocs to my group from abroad (France, China, Serbia and Germany). Currently I am the project leader of a 7 MNOK grant from the NFR petroleum program Petromaks, and a co-leader of a 9 MNOK grant from the same program. I have a broad international network of scientists working in the field of petroleum physics/geology at various universities (NTNU, MIT, ESPCI Paris, Cambridge university and the universities of Strasbourg and Stuttgart to mention some) as well as Statoil.
